

Ghan Vashishtha

Co-founder & CTO, Zeeve

[Ghan Vashishtha](#) is the Co-founder and CTO of [Zeeve](#), an enterprise-grade no-code Blockchain Infrastructure Automation platform that enables easy deployment, monitoring, and management of blockchain nodes and networks.

An enthusiastic believer of innovation, Ghan is working to create Secure Federated Learning systems that enable AI/ML in a decentralised setting while assisting startups and businesses with blockchain DevOps, dApp deployments, and solutions. He provides enterprises with the ability to deploy blockchain nodes in minutes, monitor them in real time, visualise their networks, and much more.

Prior to making his foray into the blockchain business, Ghan helped the defense and aerospace industries by offering game-changing, cutting-edge, and combat-ready technologies for the global defense market. Besides the aerospace and defense industries, Ghan played a pivotal role in the transition from twisted pair to VOIP in telecommunications. Additionally, he contributed significantly to converting old broadcasting systems into modern cloud-based alternatives.

With more than fourteen years of experience in specialised industry sets like telecommunication, defence & aerospace, and media & broadcasting, the technology veteran turned entrepreneur is actively working on Public Web3 Protocols, Enterprise Blockchains, Trusted Execution Environments, and Federated Learning.

Ghan began his career in 2008 with Coral Telecom Ltd. He later worked for ELCOM INNOVATIONS, Planetcast Media Services Limited, and Sofocle Technologies before joining hands with [Dr Ravi Chamria](#) and [Sankalp Sharma](#) to start Zeeve in 2020.

An innovator, technology lover, and creative speaker, Ghan is capable of foreseeing market demands and inventing products accordingly.

About Zeeve

Zeeve is an enterprise-grade no-code Blockchain Infrastructure Automation platform that enables Enterprises, Blockchain Startups, Blockchain Consulting Companies and Web3 Developers to deploy Blockchain nodes and Decentralised Apps within minutes, and manage them with advanced analytics and real-time alerts. In June 2022, the Startup raised \$2.65 Million in a Seed Round from Leo Capital and Blu Ventures. It plans to deploy the funds towards product development, augmenting the technology team and enhancing its reach among DApp developers and global corporations.
