Dr. Ravi Chamria
Co Founder & CEO, Zeeve

Dr Ravi Chamria is the Co-founder & CEO of Zeeve, an enterprise-grade no-code Blockchain Infrastructure Automation platform that enables easy deployment, monitoring, and management of blockchain nodes and networks.

An Executive MBA from IIM Lucknow, Ravi has over 20 years of experience in IT consulting across sectors such as Fintech, InsurTech, Supply Chain, and e-commerce. An entrepreneur at his core, Ravi has founded multiple businesses and spearheaded them to success. Some of his previous ventures include Sofocle Technologies, Prolitus Technologies, and Kamyab Infotech. He has also held the position of CTO at the New York-headquartered Fintech, Biz2Credit, wherein he led the company's tech innovations and IT strategy.

Ravi is an early adopter and advocate of the blockchain technology and has been passionately working towards accelerating its adoption amongst enterprises and developers. He started his first blockchain venture Sofocle to build products and solutions for enterprises across industries including DeFi, BFSI, Tokenization, NFTs, Insurance, Healthcare, Manufacturing and Logistics.

At Zeeve, he aims to radically simplify the entire Blockchain DevOps through automation and plug-n-play services. Within only one year of its operations, Zeeve is catering to 10,000+ Enterprises, Blockchain Startups, Blockchain Consulting Companies, and Web3 Developers.

In addition to his professional leadership and expertise, Ravi is also a prolific speaker on topics like web3, Blockchain and eCommerce. He is also a marathon runner and an amateur chess player. Ravi is a voracious reader and writes regularly on topics like Blockchain, DeFi and Tokenization.

About Zeeve
Zeeve is an enterprise-grade no-code Blockchain Infrastructure Automation platform that enables Enterprises, Blockchain Startups, Blockchain Consulting Companies and Web3 Developers to deploy Blockchain nodes and Decentralised Apps within minutes, and manage them with advanced analytics and real-time alerts. In June 2022, the Startup raised $2.65 Million in a Seed Round from Leo Capital and Blu Ventures. It plans to deploy the funds towards product development, augmenting the technology team and enhancing its reach among DApp developers and global corporations.
